Continuation of Substance of Interview including description of the general nature of what was discussed: Examiner stated that a double patenting rejection would be made over the parent case. Claim 1 in the patent includes substantially all of the limitations of claim 1 in the instant application, but includes further steps related to above ground processing. The invention as called for claim 1 of the patent could not be practiced without infringing on claim 1 of the instant application; thus allowance would result in an undue extension of the right to exclude, Examiner suggested that a terminal disclaimer would place the application in condition for allowance. Examiner indicated that if a terminal disclaimer was not received in two weeks, a rejection would be mailed.
